TouchME[®] PET

**Touch-Activated Pet Perfume. Patented Formula.
FOR ALL PET FRIENDLY-INDUSTRIES**

TouchME Pet is a revolutionary pet cologne & conditioner containing perfume nanocapsules that stick to the pet's coat and release perfume only when activated by physical touch.

The patent-pending formula enables the nanocapsules to only break when owners "pet" their dog or cat. After spraying the pet, when their coat is touched, the capsules break and disperse the fragrance in the air.

This way, pets will smell fresher for much longer. Tests show that the pleasant scent lasts 13 times longer than any traditional spray.

How to use the product

The product is ready for immediate use with a spray ahead. Shake well before using the product. Gently spray your Dog/Cat, avoiding the ears and eyes. Leave it to dry for 10-15 min. Touch, pet, or brush your furry friend.

Application on Fabric

The product can be used on all kinds of textiles and fabrics your pet uses/touches - carpets, pillows, pet clothes, sofas, beds, towels, etc. It is safe to be used on any brushed leather and sponge surface.

Beautiful scents

-  **TouchME[®] BLUE** - A chypre, floral fragrance.
-  **TouchME[®] GOLD** - A refreshing, floral fragrance.
-  **TouchME[®] RED** - A refreshing, fruity fragrance.

All TouchME PET products are dermatologically tested and hypoallergenic.

TouchME[®] PET CBD

Touch-Activated Pet Perfume with Hemp Derived CBD Oil

TouchME PET CBD is a touch-activated pet deodoriser and conditioner containing scent nano-capsules that break only when you touch your pet. It can be used immediately after bath (for a burst of freshness) or as an in-between deodoriser that will make your pet smell like he's just been at the groomer. Applying on your pet coat acts as a perfume and conditioner.

It's made with extra beneficial ingredients like hemp seed oil and cold-pressed olive oil that are extra nourishing, extra conditioning and shine-inducing.

The new smart-technology perfume consists of nanocapsules that contain fragrance. These particles, invisible to your eyes, stick to the surfaces - pet coat, textile etc. Nanocapsules break apart on physical contact, thus neutralizing unpleasant odors. The gentle fragrance simply does not evaporate, unless you activate it. It lasts 13 times longer than any regular deodoriser.

TouchME was also formulated to condition a pet's coat because too many products that make man's best friend smell good will leave his skin dry. The product contains extra ingredients to nourish the skin and make the coat smooth and silky.

How to use the product

Shake well before using the product. Gently spray your Dog/Cat, avoiding the ears and eyes. Leave to dry for 10-15 min. Touch, pet, or brush your furry friend.

Application on Fabric

The product can also be used on all kinds of textiles and fabrics your pet uses/touches - carpets, pillows, pet clothes, sofas, beds, towels, etc. It is safe to be used on any brushed leather and sponge surface.

Beautiful scents

TouchME[®] BLUE - A chypre, floral fragrance with encapsulated 100% CBD oil

TouchME[®] GOLD - A refreshing, floral fragrance with encapsulated 100% CBD oil.

TouchME[®] RED - A refreshing, fruity fragrance with encapsulated 100% CBD oil.

All TouchME PET products are dermatologically tested and hypoallergenic.

TouchME® PET

DETANGLER

Reduces grooming stress for pets, leaving them with silky, amazing-smelling coats

TouchME Detangling Spray was created to make grooming easier for pet owners while also making the experience more pleasant for pets.

TouchME Detangling Spray allows owners to safely and easily brush and refresh their pet's coat without pain or discomfort. The leave-in formula will deeply detangle and nourish a pet's coat while also offering a gentle perfume. Post-application, pets coats are left feeling soft and silky with loose knots for easier grooming.

TouchME's new detangler goes beyond being just another detangler and leave-in conditioner. This groundbreaking new product is infused with perfume nanocapsules that offer a burst of freshness and a great scent.

TouchME® Detangling Spray features

- pH balanced and hypoallergenic
- Contains encapsulated scent nanoparticles that are touch-activated and non-irritating
- Paraben and silicone free
- Safe for dogs, cats, and horses
- Convenient spray bottle
- Reduces stress of grooming by reducing fur pulling
- Neutralizes unpleasant odors
- Leave-in technology shortens shower time and decreases water and energy consumption

Any pet with long fur can benefit from these features.

All TouchME PET products are dermatologically tested and hypoallergenic.

TouchME® PET

ODOR AND STAIN REMOVER

Removes Urine Odor & Stains.

Infuses the Treated Area with Perfume Nanocapsules.

This revolutionary new product completely removes urine and related odors while also infusing the treated area with a touch-activated perfume bound by nanocapsules activated by touch. Bio-active enzymes are a main ingredient, attacking urine at the molecular level and breaking it down into harmless molecules before evaporating.

As opposed to other similar products on the market, Touchme's Stain & Odor Remover goes beyond merely removing odor and stains because it perfumes the space and fills it with freshness that lasts for days. The nanotechnological formula fills the area with a long-lasting, touch-activated scent. In just 10 minutes, TouchME helps make homes smell great for long periods of time. This product also discourages pets from urinating in the same spot because all odors are neutralized. Plus, it removes stains without provoking discoloration and alterations.

General directions for using TouchME Stain & Odor Remover are simple:

- Apply product first to hidden areas to test
- Remove urine excess, feces, or vomit with paper towels
- Saturated soiled areas with nanoScent urine overlapping edges of the stain
- Do not scrub. Do not combine with other cleaners
- Air dry
- When completely dry, vacuum or brush away residue
- Do not shampoo or steam-clean urine-soiled carpet or fabric before removing stain with TouchME

All TouchME PET products are dermatologically tested and hypoallergenic.
