5 ‰ ammonia water (20ML) uniformly dripped into the following two cat litters ammonia values experimental comparison data

1.Experimental steps: Take 1.5mm tofu cat litter and 1.5mm super strong deodorizing rice husk cat litter, and spread them evenly in two cat litter boxes with a thickness of about 6-8cm. Use a pipette to measure 20ml of ammonia water with a concentration of 5 ‰ and pour it into the cat litter at a constant speed for 30 seconds, then cover it up. After 5 minutes, remove the cat litter ball and place it in two sealable glass covers with a length of 31.5cm, a width of 31.5cm, and a height of 31.5cm. There are inlet and outlet valves on both sides of the glass cover. One end of the outlet valve is connected to a pump suction ammonia meter. After opening the inlet valve, record the readings of the ammonia meter at different times to compare the ammonia removal effects of the two types of cat litter

2.Note: The smaller the measurement data of the ammonia measuring instrument, the more accurate the data is, so the ammonia detector used for our test is WOST pump ammonia detector (range: 0-100ppm). The whole test simulates the real scene and needs to be used in the circulating air, so the glass cover intake valve and outlet valve are reserved.

Experimental equipments				
time	1.5mm tofu cat litter		1.5mm super strong deodorizing rice husk cat litter)	
5min	The test result is 72.17ppm, which is about to stop the test (in order to ensure the accuracy of the ammonia meter, reach the 70 PPM ammonia meter alarm. If the 1000ppm ammonia meter is used, it can reach more than 600ppm after 5H) 		2.17ppm

8h	-	-	5.96ppm	
Results	①1.5mm ordinary bean curd cat sand ammonia value extraordinary (in order to test the accurate range of 100 online ammonia meter), the taste of the box is exciting, completely unacceptable. ②1.5mm super deodorant grain cat litter, ammonia gas value at about 15ppm by olfactory perception. ③ 1.5mm tofu and 1.5mm highly efficient deodorant cereal cat litter, 1.5mm highly efficient deodorant cereal cat litter can effectively lock ammonia, achieve deodorization effect.
