## The story of isegrim®

---

The wolf – also known as „Isegrim“ in old German lore – is, according to our ancestor's folktales, a master of adaption, surviving in cold steppes, the forests of Europe as well as the deserts of central Asia.

The wolf has the rare gift of being able to find just what he needs to be strong and independent in each of his habitats. From the rich resources of his territory, he instinctively takes what is best for him and his pack.

Dogs have inherited this tolerance for a natural variety of food from the wolf – like him, they are wild as nature. Wolves and dogs share many traits, and dogs benefit greatly in heath and flavor from eating the way wolves do.

isegrim® is a full-nutrition dog food range containing the best nature has to offer. Inspired by the eating habits of the wolf, it consists of a high proportion of fresh meat and lots of vegetables combined with berries and wild herbs; high quality ingredients with invigorating nutrients, vitamins and oils that are suitable for the dog's metabolism and immune system. The high-quality components used for isegrim® emphasize the natural feed that dogs love. A feeding concept that takes dogs back to their roots and is attuned to the instincts of their ancestors, for an active, species-appropriate life.

#### Wild Herbs Guide

---

**Dandelion:** Provides lots of vitamins like vitamin C, Vitamin A and Vitamin K. Additionally, Dandelion contains digestive dietary fibers and antioxidants.

**Chamomile:** Can be supportive of the stomach and gastrointestinal system as well as it can decrease stress and increase relaxation.

**Plantain:** Is well known as a medical plant. It can mitigate gastrointestinal problems and support the respiratory system.

**Rosemary:** Contains essential oils which can stimulate blood circulation and have a positive effect on the immune system.

**Yarrow:** Contains bitter substances that can be relaxing as well as antispasmodic for dogs.

**Parsley:** Provides lots of healthy vitamins and minerals like magnesium, calcium and phosphorus. Its high content of vitamin K for example can support a healthy bone structure.

**Psyllium:** Can stimulate the intestinal activity as well as support a healthy intestinal flora.

**Marigold:** The essential oils in Marigold can be antiphlogistic and anticonvulsant, additionally it can support digestive organs like biliary and liver.

**Yucca:** Is very digestible and contains many valuable nutrients such as vitamins, minerals and fibers. It is also known for its preventive effect against arthritis.
